

Education

Bachelor of Technology Artificial Intelligence and Data Science

Kongu Engineering College,
Perundurai, Erode

- Current CGPA : 8.44*
- Sept 2023 - July 2027 (Batch)

High School Education

Grade 12 - 86.2%,
The Ashok Leyland School,
CBSE (2023)

Grade 10 - 88.2%,
The Ashok Leyland School,
CBSE (2021)

Technical Skills

Programming Languages

- Java
- Python
- C
- C++ (Basic)

Web Development

- React.js
 - JavaScript
 - Tailwind
 - CSS
- Node.js
 - Express.js
 - MongoDB
 - SQL

Data analytics

- Power Bi

Certifications

- Microsoft Certified: Azure AI Engineer Associate
- MongoDB Certified Associate Developer

Achievements

- Winner - 1st Techno Fest-Project Expo
- Winner - 1st IEEE Project Presentation
- Winner - 1st KEC Project presentation
- Winner - StartUp TN Hackathon
- Runner- 2nd Hacknovate - Hackathon
- Winner - 1st Ai Paper Presentation

Experience

Intel Unnati Industrial Training Feb 2025 - Apr 2025

Completed a structured industry training program with phased deliverables and mentor evaluations, gaining experience in global collaboration, professional reporting, and disciplined project delivery.

Full Stack Developer Intern Pranav Techy Jan 2026 - ongoing

Currently working on healthcare clinical management software using full-stack technologies, focusing on backend logic, database design, API integration, and frontend implementation. Contributing to clinical data handling, workflow implementation, and system optimization while collaborating with cross-functional teams to deliver scalable, secure, and maintainable software solutions.

Gen AI Consortium Nov 2024 - Jan 2025

Analyzed datasets using Python libraries (Pandas, NumPy) to explore patterns and prepare data for machine learning model implementation.

Projects

Embedding-Based Job Recommendation System

Developed an AI-driven resume screening and job-freelancer matching system using Mini LLM embeddings for semantic matching beyond keywords. Enabled similarity-based ranking and recommendations using cosine similarity, with features for freelance project posting, hiring, and automatic profile updates.

AI-Powered Smart Farming Assistant

An intelligent AI-powered assistant for farmers delivering crop recommendations, disease detection, weather forecasts, and market insights via a multilingual chatbot.Built as a MERN-based application with integrated ML/DL models achieving 92% accuracy, helping farmers effectively monitor and manage their farming activities.

Medi Link - Intel Unnati

Developed a AI-powered medical assistant chatbot that performs OCR on ingredient lists and analyzes health conditions through conversational queries using **Bio-Medical-MultiModal-Llama-3-8B-V1** with **92% accuracy**. Implemented text and voice sentiment analysis, incorporated responsible AI practices, and a real-time medical news API for daily health updates
